

FREY 1941

Inspired by the visionary desert modernism of Albert Frey, Jamie Stern's Frey 1941 brings a casual, sun-drenched spirit to the Twin Palms Collection. Its sun-drenched multicolored texture recalls terrazzo floors, desert rock-scapes, and the playful mix of tones found in mid-century interiors. Layered yet relaxed, Frey 1941 adds a lived-in charm that complements the crisp geometry of RatPack or the bold stripes of Reina Street.
